

500 words: explanatory text

An nursery solved into an pavilion like resume maybe I really could bet this it's the most complete necessities program and safest like also most compact proposal... an terrain into between walls open to pedestrian sidewalk really don't know how say into between (medianera) "party wall divisor or limits walls"., about the proposal remember its for children from 3 to 6 years so there its about not dangerous heights to fall this avoid from design... like resume the kids have their presentations into a 5 children classroom (also have place for first aid kits) over an table could play with toys a moment later the children could go to the multiple uses salon to the drawing tables, play with toys, or play videogames or even stay outside under the venturi tubes that lights the threes... so some children to maintain their character need enough mental strength so the kids will have their place to sleep., and the stairs are designed for not have trouble to kids.

The proposal was developed for the north hemisphere...

This have present its installations (waters, sewers, electricity, etc) evidently on the presentation A1
