

**Motivation Letter**

CO- Building communities

*I want to be one of the new students in IE's Master of Business in Architecture and Design. I am very excited about the prospect of following the great experience and teaching level of the staff and the contents of the Master.*

*As class representative and member of the university's student board, during my years of study, I have participated in different management activities, organization and project implementation. In addition, thanks to my professional training in construction project writing, I have been able to carry out renovation projects, competitions and graphic design. I have also managed a small family hotel, organising different types of events.*

*I want to take my work to the next level. I like very much the application of architecture in the business field, and I intend to specialize in that area. That's why I'm applying to this competition and therefore I'm showing my maximum interest in entering the IE Master.*

*The IE Master in Business for Architecture and Design bridges the gap between design and business, so learning from the world-class professionals and staff of the Master is just what I need. I am a hard-working, diligent person who is able to adapt to new workflows. Throughout my training, I have been able to adapt my studies with my work, and I hope to be able to be part of the team of this Master.*

*Thank you.*
