

### The aim

Firstly, let me introduce myself more correctly... I'm Ruba Khalid. My name "Ruba" means high hills or high places, which different than me somehow, I want high achievements rather than high places that may not be suitable for me. I want to see more creative world, more acceptance for different ideas, and an unstoppable thinking. Like how anyone (who maybe not even know a thing about art, design and architecture) knows Zaha Hadid projects or Frank Gehry or even Antoni Gaudí or Leonardo DaVinci's Mona Lisa, I want people to know my projects the same, I want to have it as my name.

So, to achieve this goal I need more knowledge, and knowledge can't come from anywhere and anyplace... Which I believes I can find it with you.

In the end, I hope you really like and enjoy seeing my project and feel the goal I wish I can achieve it, hope you also accept me for the scholarship and I wish the good for all the participants.

Thank you IE school then Arquideas for this opportunity for all designers and architects.
