

ALBERTO ROSSINI

AAM USI ARCHITECT

HI,

my name is **Alberto Rossini** and I'm an architect, recently graduated at **USI AAM**, precisely the 25 of June 2022 (Universita della Svizzera Italiana – Accademia di Architettura di Mendrisio).

I'm writing this letter because I'm particularly interested in the programs that the IE University is offering and also in the opportunity that this competition is offering to young architects like me.

As a recent graduate architect, I am aware of having to undertake a further training course, to grow both as an architect and as a person.

The challenge facing us young architects today is to think about and redefine every aspect of worldly life. The ability that has become most necessary for a modern architect is that of resilience, which is to be considered fundamental in teaching and professional growth today.

This is why I am interested not only in the offer being proposed but also in the practical implications and professional growth that this opportunity can open up to me. By improving in the planning and conception of a project, I am convinced that I can make my own the concept of resilience to which I previously referred.

I therefore submit my candidacy and in the meantime I wish you a good day.

Sincerely,

Alberto Rossini
