ADMISSIONS BOARD

IE SCHOOL OF ARCHITECTURE AND DESIGN

Respected Admissions Board ,

I am writing this letter in order to show my interest in pursuing Masters in Architecture (M.Arch) degree in your honorable university .I had graduated from Anna University ,School of Architecture and Planning (SAP) in Chennai .

As I entered Architecture after my Schooling , it was so new to me as I come from a family where no one knew about architecture ,so the word architecture it self was something new to me ,I had thought it was going to be all about sketching , then I came to know its about design and imaging things beyond boundary ,So I got more excited and terrified as I didn't come up with new crazy ideas in my first semester .I thought I'm not good for architecture ,then I met a important person ,my senior who actually taught me that everything comes with a " **process** "(trial and errors).In my second semester I was asked to design dream house ,I started slowly making design ,progressed every week by models , section sketches trying to visualize my Dream house above a mountain .That didn't help my marks in internal assessment as school wanted a solid design ,so I was marked less in the entire class even though I had models and sheets .I was broken but I don't want to put my hard work in vain because of that , I still worked ,at last before the Viva night ,I stayed over night sketching ,sketching trying to convince me to my dream house ,then of course a great Idea strike and got a great hit across my school the next day ,all the faculties ,externals praised it As the approach was new and pleasing .

I learn many things just from that one incident ,

1. Great ideas or work doesn't happen in a second ,it's always a process like climbing a mountain .
2. Never work to convince other's expectation ,then you might not be able to find a intention of your own .
3. Of be courageous ,strong and energetic in learning new thing ,never be hesitant to learn a new thing even if you're bad at it .

These things keep me alive in architecture ,also the music as I said learning new things also in my life ,I started learning Violin in college ,achieved in many competitions ,contributions to orphanage every month ,taking a adventurous trip to new places every three months and I am still running with passion for life and Architecture .

Thanks for taking time in reading my application . Pleased to hear back from you .

Warm regards,

Lakshmi Narayanan V
