

NATURE OBSERVATORY OF AMAZONIA

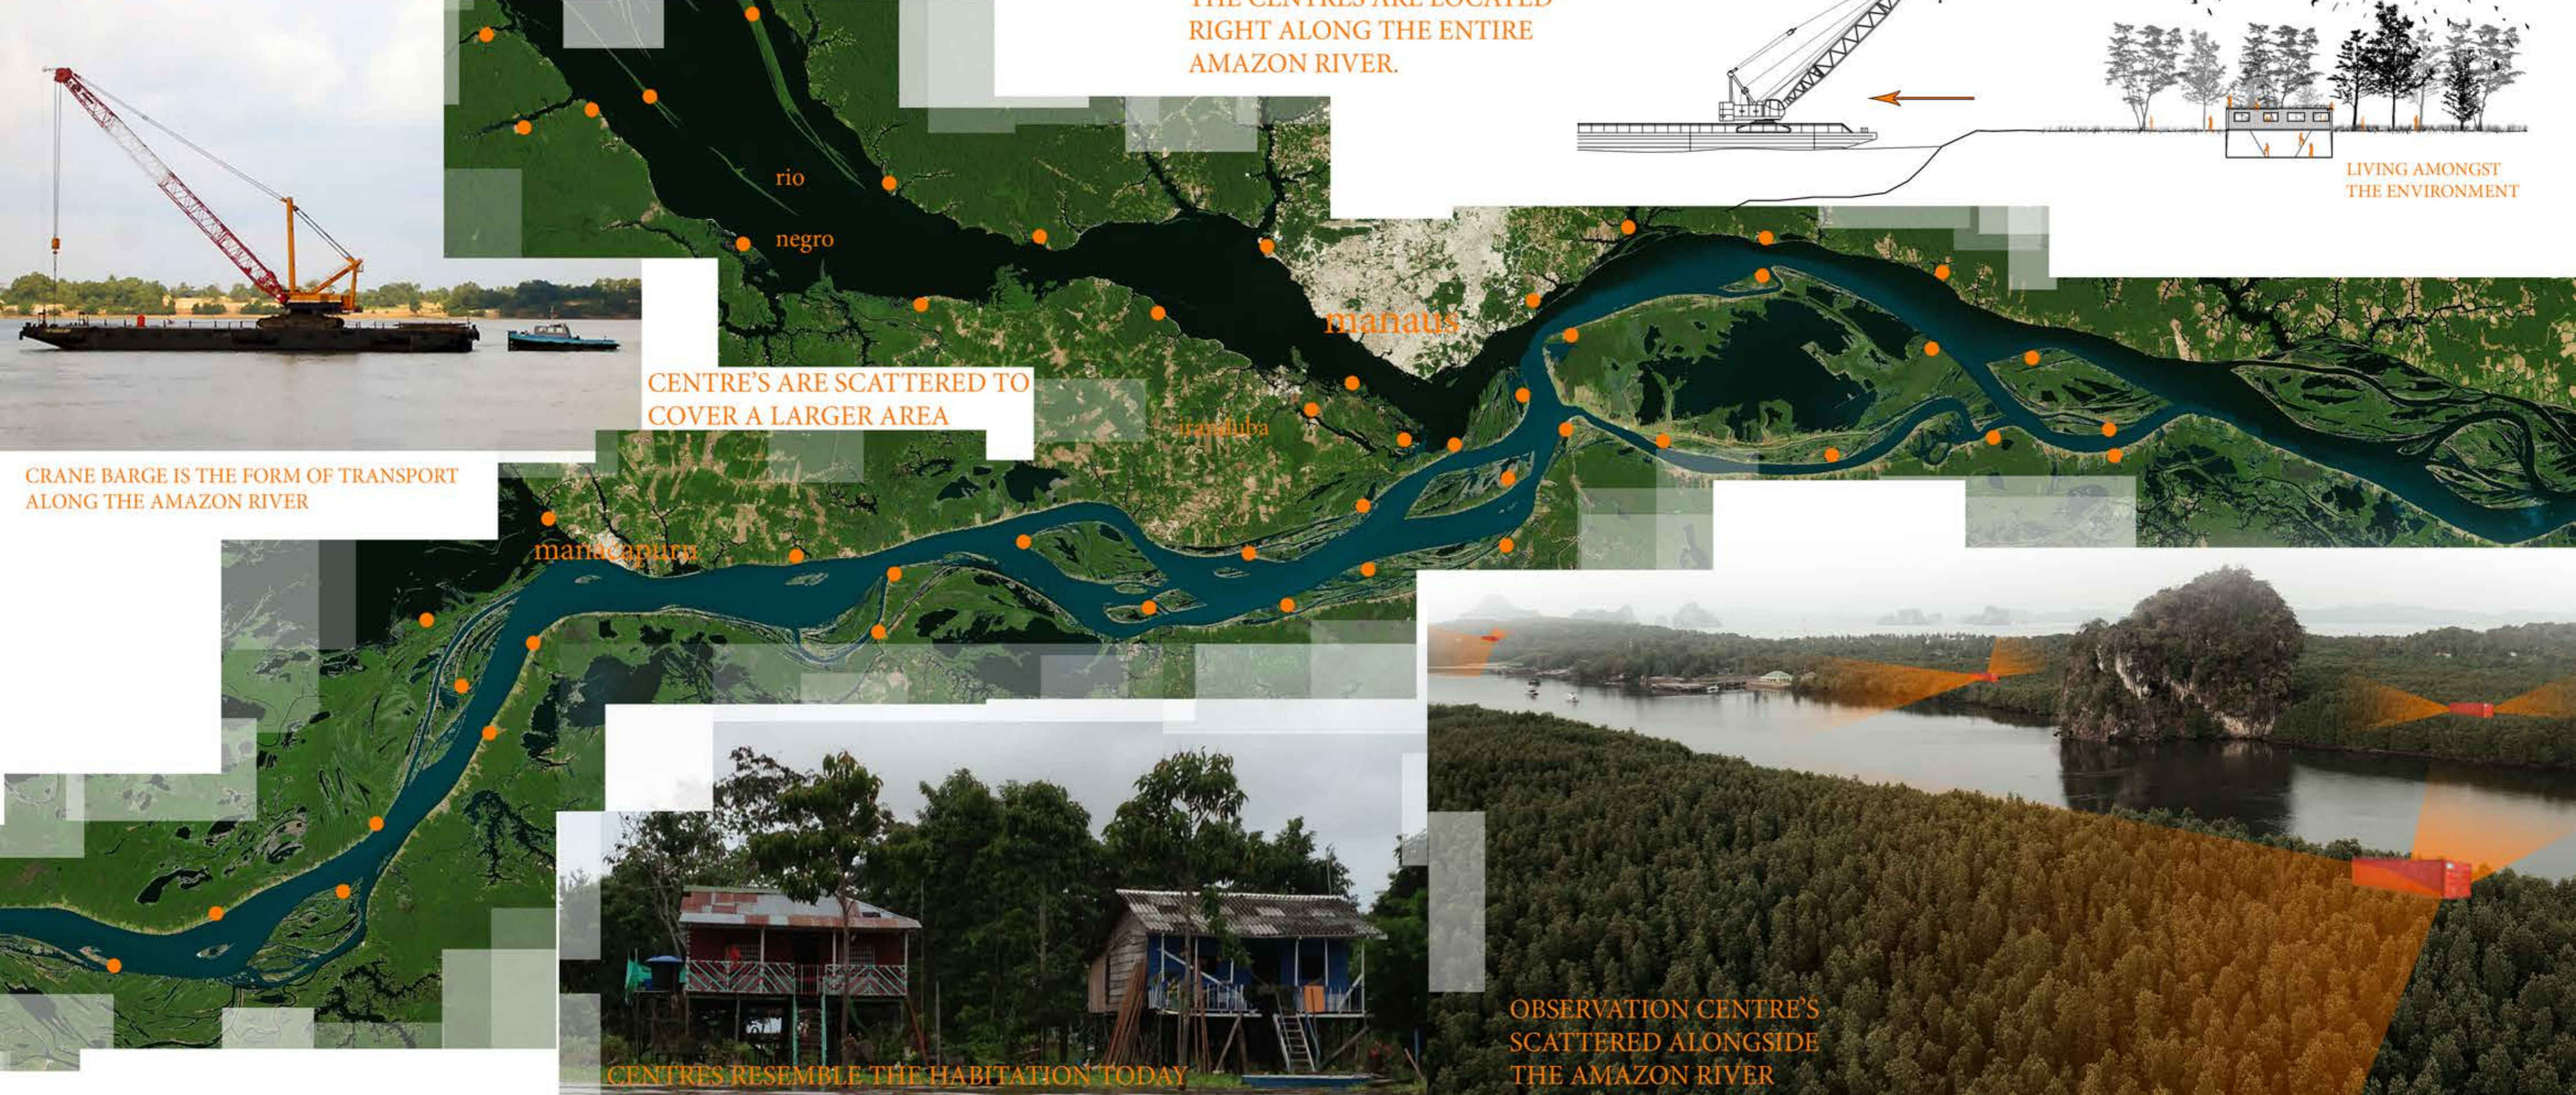

CENTRES ARE LOERED INTO THE GROUND WHEN THEY ARE NOT IN USE. THIS ALLOWS FOR A LARGER AMOUNT BECAUSE THEY CAN BE TUCKED BACK INTO THE FABRIC. THIS IN TURN, ALLOWS FOR A LARGER AREA OF EDUCATIONAL FACILITIES

THE AMAZONIAN LANDSCAPE COVERS A VAST AREA WITH VERY LITTLE TO BE KNOWN ABOUT ITS HABITAT AND ECOSYSTEM. IN ORDER FOR US TO LEARN MORE ABOUT IT, IT IS IMPERATIVE TO HAVE AS LITTLE CONTACT WITH THIS ENVIRONMENT AS POSSIBLE AND ALSO LOCATE THESE CENTRES THROUGHOUT THE LANDSCAPE COVERING A VAST AREA. THEY ESTABLISH A CLOSE DIALOGUE WITH THE LANDSCAPE AND THE NATURAL SURROUNDINGS. BEING RESPECTFUL TO THE ENVIRONMENT IS THE CORE TO THIS DESIGN. IN ORDER TO LEARN ABOUT IT, ONE MUST NOT INTERFERE WITH IT.

LOCATION; THE CENTRES ARE LOCATED RIGHT ALONG THE ENTIRE AMAZON RIVER.

CENTRE'S ARE SCATTERED TO COVER A LARGER AREA

CRANE BARGE IS THE FORM OF TRANSPORT ALONG THE AMAZON RIVER

CENTRES RESEMBLE THE HABITATION TODAY

OBSERVATION CENTRE'S SCATTERED ALONGSIDE THE AMAZON RIVER
