

# MEMORIA DESCRIPTIVA [ CEDITS ]

Research CEDITS center is a set of spaces for scientific and technological research, outreach and services on the theme of sustainable development and alternative energy, space workshops and training scientists, students and interested in the field, plus spaces for the participation of highly qualified domestic and foreign institutions, scientists and interested in sustainable and energy efficiency areas, thus building infrastructure that would necessarily incorporate the use of sustainable technologies and most current knowledge, having the ability to updated through studies, research and new technologies developed in it.

The project consists of the following modules:

Accessibility module, where a lobby, lobby spaces and engine management and general information is generated.

Modulo Bridge, communication and connection between all the different module being streamlined energy producer and linear nature observatories.

Central module made up of recreational spaces and learning how donates generates a circular endless journey, where different paths towards specialized modules Research soar.

Research Module includes spaces and workshops for scientific development in sustainable environment and so on renewables, all positioned according to their requirements and orientaciones.

## Terminal Project

Location:	Cancun, Quintana Roo, Mexico, Laguna Manati
University:	Universidad La Salle Cancún
Project Year:	2014
The project includes an area of:	22,000 m <sup>2</sup>
Designer:	Eric Gallegos Merchand
